

Professional Summary

Senior-track Computer Science graduate with 2+ years of hands-on experience in machine learning engineering and backend development. Passionate about building scalable AI pipelines and deploying production-grade models. Strong foundation in Python, TensorFlow, and SQL with demonstrated impact in real-world projects.

Education

BSc Computer Science — Cairo University

2019 – 2023 | GPA: 3.8 / 4.0

Work Experience

ML Engineer Intern — Instabug, Cairo

June 2023 – December 2023

- Built a real-time recommendation system using TensorFlow and Python, increasing user engagement by 18%.
- Optimized SQL queries for feature engineering pipelines, reducing data processing time by 40%.
- Containerized ML services with Docker and exposed REST endpoints via FastAPI.
- Collaborated with a cross-functional team using Git and Jira in an Agile environment.

Backend Developer Intern — Bosta, Cairo

January 2023 – May 2023

- Developed and maintained RESTful APIs using FastAPI serving 50k+ daily requests.
- Wrote unit and integration tests achieving 85% code coverage.
- Integrated third-party logistics APIs and handled async tasks with Celery.

Skills

Programming: Python, SQL, Bash

ML / AI: TensorFlow, scikit-learn, pandas, NumPy, Keras

Tools & DevOps: Docker, FastAPI, Git, PostgreSQL, Redis

Soft Skills: Problem Solving, Team Collaboration, Agile / Scrum
